Technical Profile:

1. Motor Type
   Shaded-pole motor

2. Electrical parameter:
   mains 230V/50Hz
   input power 38 W
   current 0.352 A
   speed 2500 rpm

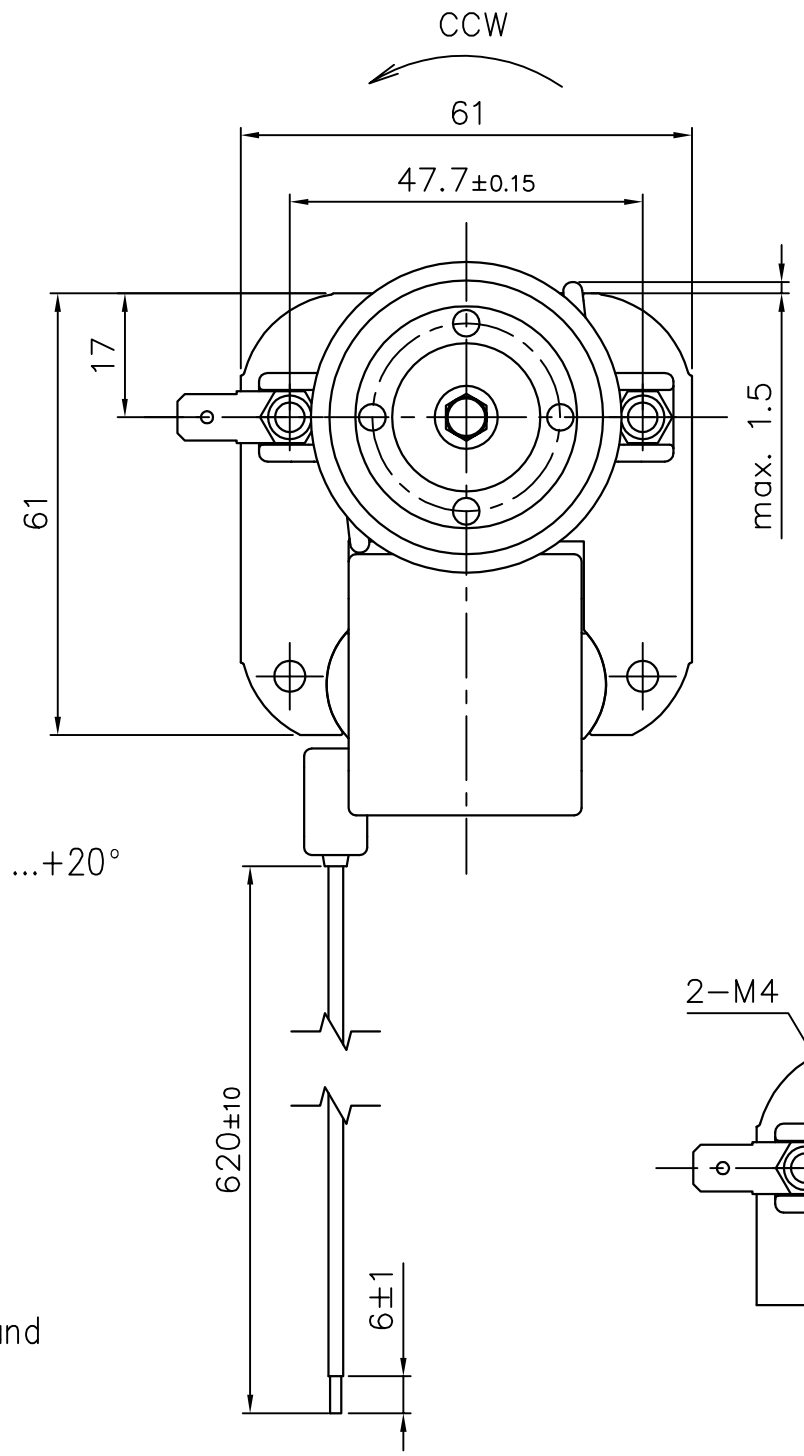

3. Insulation
   Insulation class F

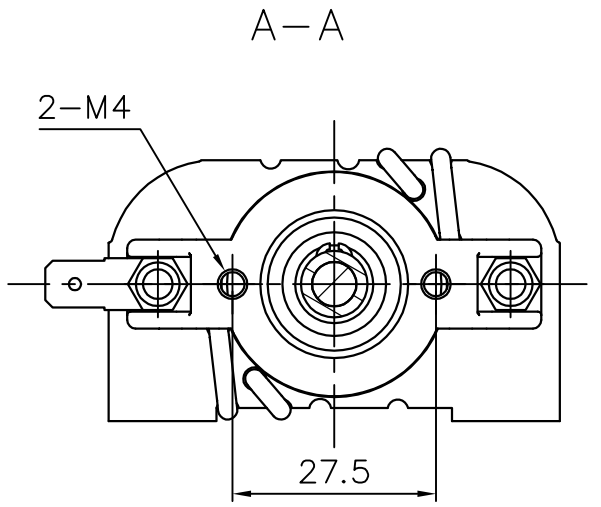

4. Application
   Permitted ambient temp. -20° ...+20°
   RoHS Compliant

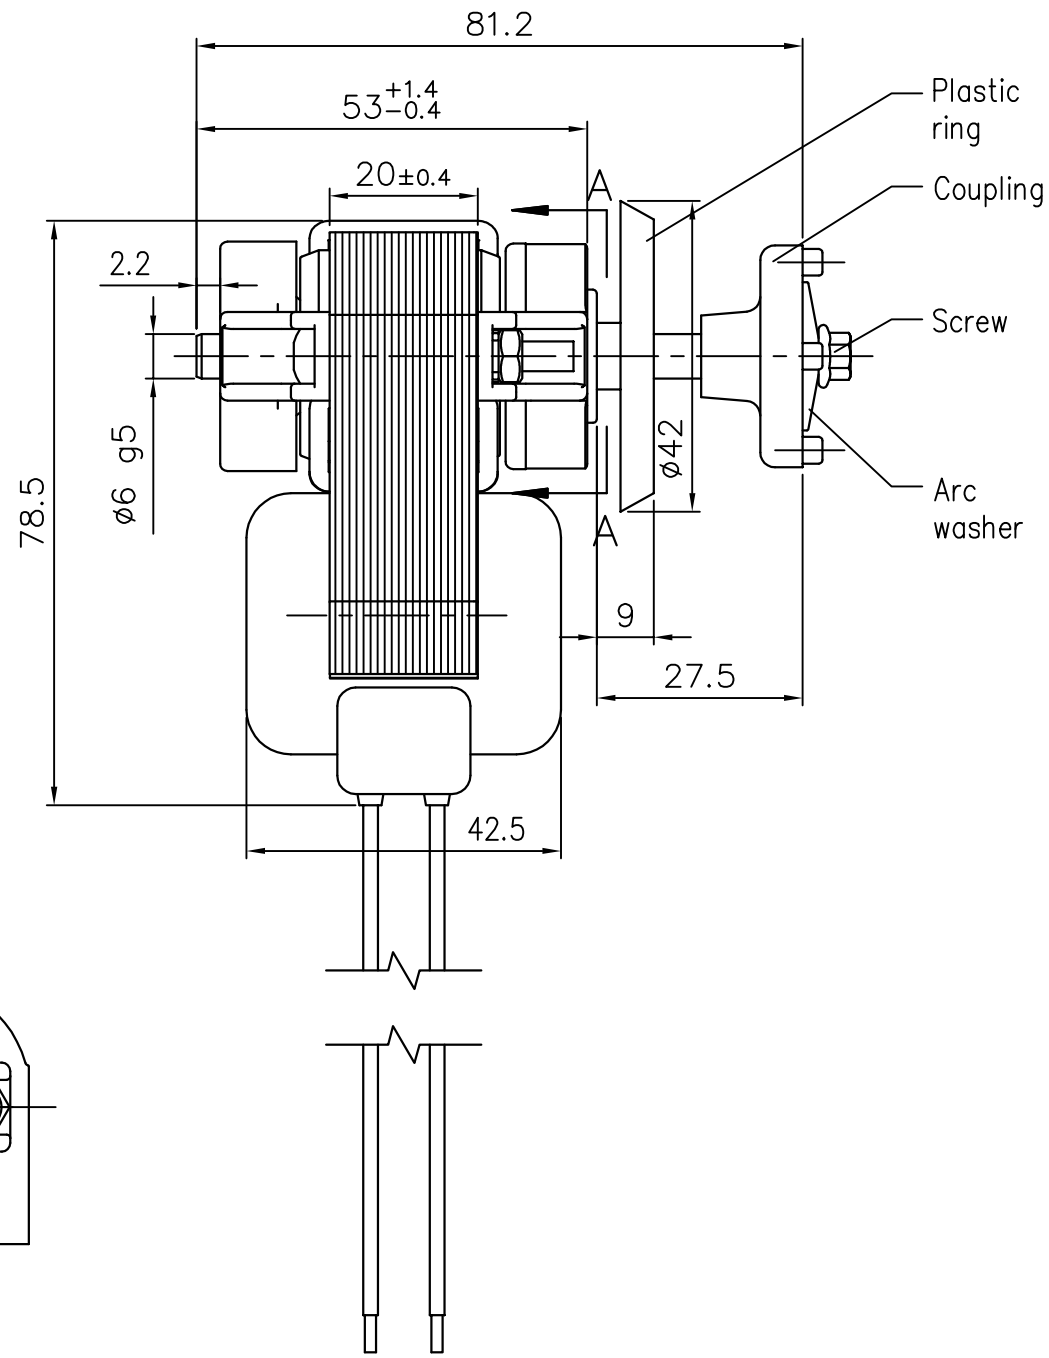

5. Material
   Bobbin UL94V-0
   Cable AWG20

6. Mounting
   Any position feasible

7. Screw,plastic ring,arc washer and coupling loose supplied

important information:
This fan/motor may only be used after installation and may not be put into operation before being properly installed.Installation has to be affected by trained,briefed & qualified staff.

security advice:
Do not reach into openings/apertures:RISK OF BODILY HARM! Protective earth wire must be connected! Beware of metal parts-they can be live! If necessary,interrupt or sever unit from current supply.
